GRAND SPA

In numerology, six represents equilibrium, balance, and perfection. This is exactly how we want you to feel when you leave the Grand Spa on the 6th floor of the Grand Hotel Wien: perfectly in balance.

Behind door 605 on the 6th floor of the Grand, an oasis of calm and well-being in the heart of the city awaits you. The 200-square-meter Grand Spa offers everything to make your stay in Vienna complete: a sauna, a steam bath, a separate women's area with its own sauna, a relaxation zone, a cardio area with the latest equipment, and one of the most comprehensive ranges of beauty and massage treatments in Vienna.

TREATMENTS

The Grand Spa features two relaxation islands, AQUA and TERRA, both of which are dedicated to your inner and outer beauty.

The earth tones of the Terra treatment room are coordinated with the extensive selection of innovative beauty treatments that can be tailored to your wishes, with products by the renowned Swiss brand VALMONT and the recently launched luxury line ISHI.

Terra's complement is the Aqua treatment room, offering highly effective, internationally developed massage techniques that depending on your desires either relax or revitalize your body and soul. While you let yourself be pampered by our spa staff, the meditative movements in the aquarium integrated in the wall provide an additional source of relaxation.

COSMETICS

Valmont

The exclusive treatment line from VALMONT was developed in Switzerland on the initiative of the renowned Valmont clinic and draws on the richly traditional heritage of Swiss healing arts. VALMONT's medical qualities make it especially suited for counteracting the degeneration of the skin.

Today, the development of the product line is handled by LABORATOIRES VALMONT, which is dedicated to creating highly efficient skincare products with visible, lasting effects. Pure, soft, and perfectly balanced glacial water extracted from the base of the Wallis glacier at a height of more than 2,000 meters is one of the key ingredients in all of the products in the VALMONT line. The ideal mineral content of this natural, unadulterated glacial water promotes the metabolic process of tissues, encourages cell regeneration, and stimulates natural defense mechanisms.
